Introduction

The mission of EcogeneticsN® is to continuously strive to improve people's quality of life through nutraceuticals based on ancient wisdom, but designed according to modern science.

We know that food ingredients affect transcription factors, protein expression and metabolite production. Gene regulation has an impact on overall health, since each nutrient and the interaction between nutrients regulate metabolic processes in unique ways.

Nutrigenomics is the science that studies how nutrients interact with genes; in other words, how DNA and the genetic code affect your need for certain nutrients and how these help maintain a healthy balance.

Our products are designed around your genes.

ecogeneticsⁿ

Objectives

Our aim is always to improve the functioning of our bodies, increasing our performance and promoting or restoring health and well-being.

The production of the EcogeneticsN® nutraceutical and nutrigenomic range follows highly demanding quality standards, because we believe product excellence begins with the quality of the raw materials, but also with the manufacturing process, which, in addition to containing no contaminants, must preserve all the nutrients of an organic and pure product.

Our philosophy is very simple: We design nutrigenomic formulas, always seek out and select the best raw materials, manufacture to the highest quality and sell at the lowest possible price.

Whatever your health needs and concerns, EcogeneticsN® supplements help you achieve your goals.

Tranquility

5 HTP Plus

90 60

**Everything your brain needs for peak performance and a positive mood.
Ideal for emotional support and improved sleep quality.**

- Helps counter depressive syndrome and promotes enjoyment of life
- Supports mental function
- Increases serotonin and dopamine levels in the brain
- Supports appetite regulation

5 HTP Plus, supplied by EcogeneticsN®, contains a synergistic combination of serotonin and dopamine precursors and activators of their respective receptors. It also contains chromium picolinate, which in clinical trials has demonstrated efficacy in the prevention and treatment of so-called "atypical depressions".

This formula has now been substantially improved with Affron®, a natural alternative shown to be effective in clinical studies for the prevention of emotional disorders associated with depression, reducing tension, stress, anxiety, anger and fatigue, while also increasing vitality and positive thinking and improving sleep quality.

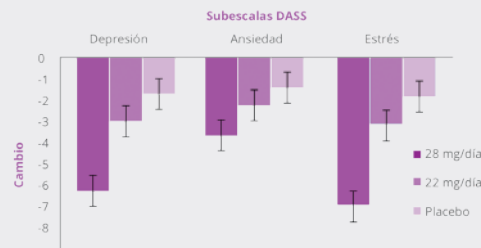

Fig.1

Taking the baseline into account, the mean change observed in the DASS test across the different subscales of depression, anxiety and stress after 4 weeks of treatment with Affron® and placebo showed an extraordinary improvement in people who simply took this product, significantly reducing their levels of stress, depression and anxiety.

Indications:

5 HTP Plus may be a nutritional supplement for individuals who want support for mental function and to increase serotonin levels in the brain.

Directions for Use/Care:

Adults should take 3 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Melatonin

90 99

SUBLINGUAL

Ecogenetics[®] Melatonin is sublingual, meaning it enters the bloodstream directly through the sublingual veins, resulting in maximum absorption and effectiveness.

- Promotes completely natural sleep
- Eliminates insomnia
- Improves sleep quality
- Detoxifies cells
- Powerful anti-aging support

Melatonin is a natural hormonal nutrient synthesised from the amino acid tryptophan by the pineal gland at the back of the brain. In the body, Melatonin regulates sleep cycles, supports normal immune function and protects cells from free-radical damage.

Unlike sublingual melatonin, orally taken melatonin is absorbed in the intestine, with absorption varying from person to person, and reaches the liver, where a large proportion of the melatonin is destroyed.

Indications:

Melatonin may be a nutritional supplement for individuals who want to support pineal gland function and/or regulate sleep cycles. When travelling, it helps recovery from jet lag with great ease. It is also a powerful antioxidant. Note: Melatonin should always be taken sublingually to ensure its bioavailability.

Directions for Use/Care:

Adults should take 1 to 3 sublingual tablets a day, or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place. Keep out of reach of children. Excessive consumption may have a laxative effect. Contains no allergens.

Nutritional Information per sublingual tablet:

Melatonin	1MG
-----------	-----

Nootropic

60 6b

Discover the full potential of your mind with this supplement combining 15 remarkable nutrigenomic compounds designed to enhance your brain capacity.

- Improves memory
- Improves attention and concentration
- Improves mood
- Reduces mental fatigue
- Enhances cognitive abilities and creativity

The success of nootropics is due to the fact that they act as an additive to neurochemical substances already present in the brain. These chemicals, including enzymes, hormones and neurotransmitters, help improve cognitive functions.

In addition to improving cognitive functions, they also have the ability to increase the blood supply directed to the brain and support the overall growth of the brain's nervous system.

Nutrients such as Choline are essential for nourishing the brain and helping it maintain its capabilities.

Indications:

Nootropic may be a nutritional supplement for individuals seeking support to improve productivity, sleep quality, mood, body-mind coordination, neuroplasticity, vocabulary and circulation to the brain, as well as to help avoid depression, provide greater emotional stability, protect the brain and regulate stress.

Directions for Use/Care:

Adults should take 1 to 3 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains soya derivatives.

Tranquility

60 66

Powerful combination of 8 nutrigenomic compounds proven effective in eliminating stress and anxiety, as well as toning the adrenal glands.

- Eliminates anxiety
- Reduces stress
- Combats excessive anger
- Tones the adrenal glands
- Helps with digestive problems

Serious problems can arise when we are subjected to constant stress, such as toxic personal or work environments, professional challenges, and more.

Long-term activation of the stress response system can lead to a range of health problems, affecting the cardiovascular, immune, neurological and metabolic systems.

EcogeneticsN® Tranquility, while regulating cortisol release, effectively tones the adrenal glands, helping us maintain calm, steady energy.

Indications:

Tranquility may be a nutritional supplement for individuals seeking support to improve sleep problems, reduce anxiety, combat depression, help with digestive problems, prevent heart disease, avoid impaired memory and concentration, help combat obesity, prevent diabetes, reduce excessive anger, and prevent and reduce adrenal insufficiency.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Digestive Care

Digestion
Digestive Enzymes
Probiotics

Digestion

60 66

Digestion has a unique combination of probiotics, prebiotics, herbs and additional nutrients that help support a healthy digestive system.

- Helps reduce symptoms of gas and bloating
- Helps prevent uncontrolled food cravings
- Promotes and regulates intestinal function
- Blocks Lectins (proteins found in some foods that interfere with digestion and overall health)

When our digestive system is challenged over time by an inadequate diet, oxidative stress from free radicals, mental and emotional stress, heavy metals, toxin overload, invaders and other factors, our overall vitality can be compromised.

A sluggish digestive environment can affect many areas of health. By supporting digestive function with selective nutraceuticals and research-based plants, we can also support immunity, vitality, cognitive health and much more.

This supplement is also indicated for occasional situations in which there is a need to control unpleasant symptoms during/after eating certain foods that may be more difficult to digest, such as gluten, lactose and lectins, among others.

Indications:

Digestion may be an ideal nutritional supplement for individuals who want support for digestive function and regulation of intestinal function.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Digestive Enzymes

900b

Digestive Enzymes are the ideal nutritional supplement for anyone wishing to complement their diet with digestive enzymes of non-animal origin.

- Provides specific enzymes for fats, carbohydrates, proteins and also lactose, with effectiveness similar to digestive enzymes
- Also provides a powerful group of proteolytic enzymes essential for the proper functioning of the body

In our body, digestive enzymes are produced mainly in the pancreas and small intestine and help break food down into nutrients so they can subsequently be absorbed by the body.

You should take digestive enzyme supplements when you experience the following symptoms:

- Gas and bloating after meals
- Feeling of food remaining in the stomach (like a "heavy stomach")
- Feeling full after eating a very small amount of food
- Stools containing undigested food
- Persistently floating stools

Indications:

Digestive Enzymes are the ideal nutritional supplement for anyone wishing to complement their diet with digestive enzymes of non-animal origin, supporting the entire digestive process.

Directions for Use/Care:

Adults should take 1 tablet 3 times a day, at the beginning of the main meals, or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Probiotics

60 66

EcogeneticsN® Probiotics is an essential supplement for regulating and promoting the proper functioning of several systems in our body, particularly the digestive system.

- Promotes the balance and effectiveness of the immune system
- Promotes optimal regulation of metabolism
- Promotes eubiosis and gastrointestinal health
- Promotes the gut-brain axis
- Promotes oral health
- Promotes genitourinary health

Each capsule provides 100 billion active probiotic cultures, offering 14 different strains scientifically shown to be essential for the proper functioning of the human body and specially selected for their ability to survive the harsh conditions of the gastrointestinal tract, thereby providing excellent results and major benefits for health and the body's defences.

The balance of the natural microflora can be disrupted by medicines (such as antibiotics, oral contraceptives, etc.), excessive alcohol consumption or poor dietary intake. This supplement can activate more than 1,700 genes involved in immune and inflammatory signalling and is characterised by benefits for immunity and the gastrointestinal tract.

Indications:

Probiotics may be a supplement for individuals who want to maintain or promote proper functioning of the digestive system, immune system, gastrointestinal health, oral health, metabolic system, among others.

Directions for Use/Care:

Adults should take 1 capsule a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Once opened, keep refrigerated. May contain traces of milk and soya.

Nutritional Information per capsule:

Mineral

Iron+

60 60

Iron+ provides iron in a double-chelated form together with several vitamins, such as Vitamin C, and other nutrients to increase iron bioavailability, achieving a higher absorption rate for this mineral than comparable products available on the natural supplement market.

- Iron support for people with problems related to low blood haemoglobin (anaemia)
- Supports immune-system function
- Regulates body temperature
- Helps haemoglobin formation and oxygen transport throughout the body
- Helps in cases of insomnia
- Promotes muscle health and performance
- Enhances brain function

Vitamin C helps iron absorption and, like all the other vitamins in this formula, contributes to normal nervous-system function and to reducing fatigue. This mineral is also essential for high-performance athletes or people with very high physical demands, because in these cases iron loss and requirements are much greater. In such situations, iron contributes to the respiratory process that transports oxygen to tissues, forms part of enzymes involved in cellular respiration and helps provide more energy throughout the body.

It is also essential during pregnancy, because it plays an important role in the formation of red blood cells, supports the formation and development of the nervous system, and supports the baby's energy metabolism. This highly bioavailable formula is supplied in capsule form, with minimal metallic taste.

Indications:

Iron+ is a food supplement formulated to meet daily nutritional iron requirements, complemented with several vitamins and other nutrients to facilitate absorption and complement/strengthen its action. It is intended to help address low iron levels in cases of anaemia or significant blood loss (heavy menstruation), during pregnancy, or in athletes with high physical demands.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Magnesium Bisglycinate

120 

Magnesium participates in more than 300 chemical reactions in our body, yet despite being present in many foods, magnesium deficiency is now widespread in the population.

- Reduces tiredness and fatigue
- Supports proper nervous-system function
- Helps maintain blood-pressure levels
- Supports proper muscle function
- Contributes to the maintenance of bones and teeth
- Supports immunity

This supplement provides magnesium in a double-chelated form, making Magnesium Bisglycinate more bioavailable. In other words, its absorption does not depend on gastric juices, as it uses mechanisms similar to those used by amino acids, allowing it to be absorbed and used more easily by the body.

Because of its ability to support communication between the nervous system and other systems in the body, this supplement may also help improve mental functions.

Indications:

Magnesium Bisglycinate may be an ideal nutritional supplement for individuals who want support/help to restore optimal levels of this mineral in the body, helping reduce tiredness and fatigue and contributing to normal nervous-system and muscle function, normal protein synthesis, normal psychological function, maintenance of normal bones, normal energy-yielding metabolism, electrolyte balance, maintenance of normal teeth, the process of cell division, maintenance of blood-pressure levels and support for immunity.

Directions for Use/Care:

Adults should take 3 to 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Multinutrients

600

All essential vitamins and vital nutrients in a completely natural, pure and raw formula, specially designed to meet the daily nutritional needs of active people.

- All nutrients are provided in their most bioavailable and bioactive form
- Increases energy and supports metabolism
- Provides the 16 essential vitamins needed for the proper functioning of the body
- Provides 6 powerful antioxidants
- Supports the immune system

Contains green plant-based foods, including important phytonutrients, with no preservatives or sweeteners, artificial colours or flavourings, herbicides, pesticides or other chemicals, genetically modified organisms, yeast, gluten, milk/dairy products, corn, sodium or starch.

Minerals and trace elements are supplied in their safest and most bioavailable forms. Certain nutrients, such as beta-carotene, vitamin C, vitamin E and B-complex vitamins, are included in high-potency amounts because of the vital roles they play in antioxidant protection, energy production, maintenance of healthy blood cells, nervous-system function, hormonal balance and much more.

Indications:

Multinutrients may be a nutritional supplement for individuals seeking support/help to meet daily nutritional needs by supplying a range of vitamins and minerals with antioxidants that work synergistically to provide greater bioavailability. It promotes increased energy, protects the body from the action of free radicals and improves overall health so you can live with more energy and vitality.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Potássio 1000+ 120 60

POTASSIUM 1000+ is a premium supplement designed to help address inadequate potassium intake and thereby support normal kidney, heart, muscle and skeletal function.

- Cardiovascular diseases
- Optimal blood pressure
- Patients undergoing dialysis
- Use of corticosteroids in various diseases
- Use of diuretics
- Muscle cramps

Potassium is necessary for the normal functioning of cells, nerves and muscles. It is the third most abundant mineral in the body, after calcium and phosphorus, and plays an extremely important role because it is an electrolyte and is essential to numerous functions. It is also necessary for the proper functioning of nerve impulses and for the contraction of all the muscles in the human body, and it helps maintain a regular, normal heartbeat. Another essential role of potassium in the human body is to store carbohydrates, which are converted into energy.

It also provides highly bioavailable phosphorus, which is essential for the formation of DNA and RNA, as well as ATP, and is therefore essential for overall energy production in the body and for muscle performance. Phosphorus is also indispensable for the body's absorption and use of calcium.

Indications:

Potassium 1000+ may be a nutritional supplement to meet daily potassium requirements, providing it in its most bioavailable form (Dipotassium Phosphate). It is also a supplement with high phosphorus bioavailability. Potassium deficiency may lead to high blood pressure. Patients undergoing dialysis may have severe potassium deficiencies. Potassium is a key regulator of body fluids and plays a decisive role in helping prevent fluid retention and oedema (a feeling of tired legs and visibly swollen legs and hands). Muscle cramps can be an early sign of potassium deficiency.

Directions for Use/Care:

Adults should take 3 to 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Vitamin B Complex

30 00

High-quality supplement with B-complex vitamins in their most bioavailable and bioactive forms, designed to help maintain higher energy levels, prevent fatigue, support stress management and support the entire nervous system.

B-complex vitamins are important for blood cells, hormones and nervous-system function.

As water-soluble substances, B vitamins are not generally stored in the body in appreciable amounts (with the exception of vitamin B12). The body therefore needs an adequate daily supply of B vitamins.

There are situations in which B-complex vitamin deficiency is more likely, for example:

- Anaemia when caused by Vitamin B12 deficiency
- A vegetarian or vegan diet that may lead to Vitamin B12 deficiency
- An inadequate diet or digestive problems that prevent proper nutrient absorption
- Medical conditions that affect absorption (such as Crohn's disease)
- Certain medicines may lead to B-complex vitamin deficiencies, among other causes

Indications:

B-complex vitamins may be used to address deficiencies of these vitamins and their manifestations in a variety of areas such as dermatology, paediatrics and others. This supplement may help in cases of coeliac disease and cradle cap, malnutrition, restoration of intestinal flora, diets for people with diabetes or ulcers, stomatitis, chronic alcoholism, anorexia and asthenia, among others. It plays an important role in maintaining higher energy levels in the body, which are needed to manage everyday stress.

Directions for Use/Care:

Adults should take 1 capsule a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Alkaline Vitamin C

600

This supplement contains a non-acidic form of vitamin C based on calcium ascorbate, combined with powerful antioxidants to support the healthy functioning of the whole body.

- Has an alkaline pH
- Supports the immune system
- Supports the circulatory system
- Detoxifies cells and protects them from free radicals

The antioxidant functions of vitamin C appear to have clinical significance in providing protection against free-radical damage in the eyes, lungs, blood and immune system.

It is essential for the synthesis of collagen and glycosaminoglycans, which are the building materials of all connective tissues, such as blood vessels, tendons, joint cartilage and bones.

Vitamin C is also essential for normal wound healing and hair health.

In addition to vitamin C, it contains a bioflavonoid complex - powerful phytochemicals that, among other specific properties, help enhance the benefits of this vitamin.

Hesperidin, together with vitamin C, is essential for helping prevent and correct capillary fragility, with anti-inflammatory, anti-exudative and LDL-cholesterol antioxidant properties.

Indications:

Alkaline Vitamin C may be a useful food supplement for those wishing to complement their diet with this unique blend of non-acidic vitamin C, citrus bioflavonoids, hesperidin and naringin. Its main benefits are helping to combat free radicals, helping prevent cardiovascular disease, supporting eye health, reducing flu-like symptoms, improving the quality and appearance of skin, hair and nails, and helping reduce levels of bad cholesterol (LDL).

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Vitamin D3 4000

60 6b

Vitamin D3 supplement - the sunshine vitamin - which in our body is responsible for maintaining more than 2000 genes and is decisive for the proper functioning of cells, tissues and organs.

- Regulates more than 2000 genes in our body
- Slows aging
- Supports reproductive health
- Strengthens and regulates the immune system
- Promotes a positive mood and sense of well-being

In addition to its traditional involvement in calcium and phosphorus metabolism, there is now a growing body of evidence indicating that it is indispensable in the prevention of a range of cancers (colon, breast, lung, pancreas, ovary, prostate), as well as in serotonin formation and its antidepressant effect.

Of the two types of Vitamin D, D2 (ergocalciferol) and D3 (cholecalciferol), only the latter performs the organic functions described above.

Indications:

Vitamin D3 4000 is a nutritional supplement for individuals who wish to supplement Vitamin D levels in the body. Its main benefits include supporting cardiovascular health, athletic performance, muscle development, cellular formation and longevity, the process of slowing aging, pancreatic health, reproductive health, the health of the skin, hair, bones and eyes, respiratory health, sleep patterns, hearing, the immune system, weight control, digestion and food absorption, as well as a positive mood and sense of well-being.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Vitamin E

Tocotrienols + Tocopherols

60 60

Vitamin E has very important antioxidant properties. It protects the body's cells against the harmful effects of oxidative stress and degeneration, thereby helping combat aging. It protects against cardiovascular disease, reducing the risk of heart attack and stroke.

- High content of all types of TOCOTRIENOLS
- Powerful antioxidant
- Helps prevent cardiovascular disease
- Reduces the risk of complications in cases of cardiovascular disease
- Strengthens the immune system
- Helps regulate optimal cholesterol levels

Ecogenetics Vitamin E is a revolutionary supplement which, in addition to the full spectrum of Tocopherols (alpha-tocopherol, beta-tocopherol, gamma-tocopherol and delta-tocopherol), also provides high doses of the full spectrum of essential Tocotrienols (alpha-tocotrienol, beta-tocotrienol, gamma-tocotrienol and delta-tocotrienol).

Tocotrienols are members of the vitamin E family that stand out for their distinct biological activities compared with Tocopherols (so-called "common vitamin E"). What makes Tocotrienols so unique is their molecular structure, characterised by three double bonds, which increases their ability to penetrate cells effectively. They are powerful free-radical scavengers that help support normal arterial function, healthy cholesterol metabolism and brain and liver health.

Indications:

Vitamin E is a nutritional supplement for individuals who wish to supplement their levels of this vitamin in the body, helping prevent disease and improve the cardiovascular system.

Directions for Use/Care:

Adults should take 1 capsule a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Mineral

118ML

THE ELECTROLYTE SOLUTION PREFERRED BY NORTH AMERICAN ATHLETES

Mineral contains the 72 minerals the body needs every day and, without them, vitamins are not absorbed. It is the most powerful natural pH regulator occurring naturally in the Great Salt Lake, Utah - USA.

- Seawater solution with 6 times the mineral concentration and a balanced sodium concentration
- Strengthens bones, joints and teeth
- Nourishes and tones the skin, hair and nails
- Provides the trace minerals essential for the proper functioning of the body
- Supports calcium assimilation
- Helps maintain pH balance

Uses and Applications:

- Improved performance in athletes, among others
- Hair and skin
- Intestine
- Circulatory health
- pH balance
- Calcium assimilation
- Electrolyte replenishment
- Water remineralisation
- Bones and joints

Indications:

Mineral may be a useful food supplement for those wishing to complement their diet with more than 72 ionic minerals. In addition to providing the body with all the minerals it needs, it helps regulate natural pH. Use of this supplement may offer benefits for bones and joints, hair and skin, the intestine, calcium assimilation, circulatory health and the activation and enhancement of vitamins. It may also be used to remineralise everyday drinking water, increase sports performance and replenish minerals, both for pets and for plants.

Directions for Use/Care:

Adults should take 10 drops in a glass of water or juice for the first 3 days, increasing up to 30 drops, which should then be divided into 2 doses of 15 drops each, or as prescribed. Children aged 2-3 years should take one drop per 2.5 kg of body weight. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied diet. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Cardiovascular Health

Coenzyme Q10
Krill+DHA Plus
Liponutrientes

Coenzyme Q 10

120 tb

SUBLINGUAL

Supplement providing COENZYME Q10 and N-ACETYL-L-CARNITINE for sublingual absorption, naturally fermented, with no sugar, artificial colours or flavourings, providing faster and greater absorption. It is intended to help meet Coenzyme Q10 requirements that are not satisfied through diet and biosynthesis of the molecule.

- Essential for carrying oxygen to every cell
- Increases energy and the feeling of vitality
- Supports heart-muscle function
- With N-Acetyl-L-Carnitine - Dr Sinatra Protocol
- Sublingual for greater absorption

Because almost all cellular activities depend on energy, Coenzyme Q10 is essential for the health of all human tissues and organs. It is also a naturally occurring antioxidant nutrient that slows the formation of free radicals in biological systems.

Coenzyme Q10 is also important for maintaining blood vessels and heart-muscle function. In addition, people taking statins may develop Coenzyme Q10 deficiencies and may need supplementation to address these deficiencies.

L-Carnitine is involved in the metabolism of fats and carbohydrates. It transports fatty acids to the mitochondria for the production of Adenosine Triphosphate (ATP). L-Carnitine carries oxygen and fatty acids to the cells. There, Coenzyme Q10 helps convert them into energy.

Indications:

Sublingual Coenzyme Q10 may be a useful supplement for individuals whose dietary Coenzyme Q10 requirements are not met through biosynthesis of the molecule.

Directions for Use/Care:

Adults should take 4 sublingual tablets a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Keep out of reach of children. Contains no allergens. Excessive consumption may have a laxative effect.

Nutritional Information per sublingual tablet:

N-Acetil-L-Carnitina HCl	100MG
Coenzima Q10 (Ubiquinona)	10MG

Krill+DHA Plus

600g

Krill + DHA Plus is a formula for those wishing to supplement their diet with the most bioavailable source of Omega 3, krill oil. It is a supplement for those who wish to improve cardiovascular and brain function.

- Highly bioavailable source (phospholipids) of Omega 3 with almost 500 mg of EPA/DHA per capsule
- A major source of nourishment for the brain and cells

Antarctic Krill Oil is made from krill with a high percentage of DHA and choline, which are essential for adults and also for normal fetal and infant brain development. It contains omega-3 fats, eicosapentaenoic acid (EPA) and docosahexaenoic acid (DHA).

Most fish oils are in triglyceride form, whereas Krill Oil is in phospholipid form, which is more stable, with the addition of astaxanthin to support further stabilisation, together with all the other recognised benefits of this substance.

This formula, enriched with EPA-DHA from fish oil that is cold-processed and free from heavy metals and contaminants, allows your body to make the most of these two exceptional sources of omega 3.

Krill + DHA PLUS now features an improved enteric-capsule formula, providing greater product stability and better protection against gastric acids, allowing better absorption and a significant reduction in gastrointestinal discomfort.

Indications:

Krill+DHA Plus may be a nutritional supplement for individuals seeking support/help to meet daily omega-3 requirements. Krill oil is a rich, highly bioavailable source of omega 3 in the form of phospholipids that nourish the brain and protect cells and the heart. It also has anti-inflammatory activity because it is a precursor of anti-inflammatory prostaglandins.

Directions for Use/Care:

Adults should take 1 to 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Not suitable for people with fish or shellfish allergies.

Nutritional Information per 1 capsule:

Lipid Extract from Antarctic Krill Crustacean (<i>Euphasia Superba</i>)	500MG
Provides:	
Eicosapentaenoic Acid (EPA)	75MG
Docosahexaenoic Acid (DHA)	40MG
Astaxantina	0,10MG
Fish Oil (TG1050)	500MG
Provides:	
Eicosapentaenoic Acid (EPA)	50MG
Docosahexaenoic Acid (DHA)	250MG
Bovine Gelatin (enteric capsule release GELITA® EC)	
100 grams of product contain approximately 732 kcal	

Liponutrientes

9000

Formula containing Selective Kinase Response Modulators (SKRMs) that improve insulin tolerance and lipid parameters. SKRMs derived from plant-based compounds have the ability to modulate specific cellular signalling pathways that may play a role in chronic disease.

- Supports the regulation and balance of cholesterol levels
- Helps prevent oxidation of lipids and cholesterol

Although cholesterol performs an important function, too much cholesterol in the blood can increase the risk of heart attack or stroke.

Provides 30 mg of plant sterols per dose, in line with international recommendations, together with high-quality nutrition for patients with hypercholesterolaemia.

Unused cholesterol can accumulate in the arteries, causing them to harden or narrow and reducing their ability to function properly.

This condition, known as atherosclerosis, can lead to angina (chest pain), heart failure (the heart cannot pump blood adequately), or arrhythmia (irregular heartbeat or rhythm).

Indications:

Liponutrients may be a nutritional supplement for individuals who wish to achieve healthy cholesterol levels.

Directions for Use/Care:

Adults should take 3 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. It should not be consumed by pregnant or breastfeeding women, children under 18 years of age or adults over 70 years of age unless prescribed/recommended by a doctor/pharmacist. If you have health problems, consult your doctor before taking this product. Do not consume if you are already taking other products containing red yeast rice. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Cells Plus

1200g

One of the most effective nutrigenomic supplements for protecting your cells and your health. This formula is exceptionally rich in polyphenols that help the body maintain higher energy levels, protect the cardiovascular system, promote better digestion and support healthier skin.

- Helps inhibit metastasis
- Modulates hormonal, anti-inflammatory and anti-tumour function
- Strengthens the immune system
- Helps detoxify the liver and supports its function

This exclusive formula is designed to:

- Inhibit angiogenesis and, consequently, metastasis;
- Modulate hormonal, anti-inflammatory and anti-tumour function;
- Activate the Nrf2 genetic pathway, which regulates the production of important antioxidants such as Glutathione and Superoxide Dismutase (SOD), as well as detoxification enzymes including Glutathione-S-transferase, while down-regulating inflammatory factors such as NF-K;
- Strengthen the immune system and detoxify the liver.

Our cells are increasingly exposed to enormous pressures from environmental factors, in which diet and lifestyle play a decisive role, placing a high burden of free radicals and inflammatory factors on the body.

Indications:

Cells Plus is a nutritional supplement extremely rich in polyphenols for individuals who wish to increase energy and vitality levels, protect the cardiovascular system, promote better digestion and support healthier skin. It is also ideal as support alongside oncology treatments, due to its angiogenesis-inhibiting and therefore metastasis-inhibiting properties, and for those who wish to strengthen the immune system and detoxify the liver.

Directions for Use/Care:

Adults should take 2 to 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Nutritional Information per 4 capsules:

Quercitina (Sophora Japonica flowers)(95% biofalvonoides-HPLC)	300MG
Scutellaria Baicalensis root extract 5:1	200MG
Curcuma longa Rhizome (standardised to 95% curcumin)	200MG
Astragalus membranaceus Root (standardised to 16% polysaccharides, 5:1)	200MG
Green Tea Extract (leaf) (standardised to 98% polyphenols and 50% EGCG)	200MG
Broccoli (extract)	200MG
Phytosterol Complex (6.53 g per 100 g of product)	150MG
Reishi (Ganoderma Lucidum) powder	125MG
Cordyceps Sinensis extract 7% manitol	60MG
Saw Palmetto - Dwarf Palm Berry Extract (standardised to 45% lipid concentration)	60MG
Vegetable Capsule Shell (Hydroxypropyl Methylcellulose)	

Immune

60 6b

Immune is a powerful nutrigenomic formula scientifically designed to promote proper Immune System function. This exclusive combination of selected plant components and nutrients influences signalling kinases (Selective Kinase Response Modulators - SKRMs) that "communicate" with genes which modulate pathways involved in optimising immune-system function.

- Modulates and optimises immune-system function
- Promotes recovery in cases of flu or colds
- Helps with autoimmune problems
- Slows premature cellular aging
- Increases energy and stamina
- Helps the body combat cell-damaging free radicals
- Reduces allergy symptoms
- Helps keep the lungs clear and thins mucus

Immune provides a high degree of balance in immune function and also targets key determinants linked to immunity - such as the activity of eicosanoids, cytokines, white blood cells, phagocytes, mast cells, eosinophils, basophils and lymphocytes (B cells and T cells) - which are associated with priority immune-system responses.

Healthy immune-system function is essential for protecting the body and responding to possible attacks by viruses, bacteria, germs, parasites and fungi. Developed through processes that combine the latest advances in nutrigenomics and cellular proteomics, IMMUNE ensures maximum safety and effectiveness.

Indications:

Immune is a supplement designed to promote optimal immune-system function, providing protection and facilitating the body's response to possible attacks by viruses, bacteria, germs, parasites and fungi.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Metabolism

1200g

The Metabolism nutrigenomic formula is scientifically designed to support a healthy metabolism, maintain balanced blood-sugar levels and reduce cravings for sweets and fat absorption.

- Supports achievement of an ideal weight
- Helps balance healthy blood-sugar levels
- Promotes normal secretion of and sensitivity to insulin and leptin (the appetite-suppressing hormone)
- Promotes healthy regulation of Ghrelin (the hormone responsible for the sensation of hunger)
- Supports healthy metabolism of carbohydrates, fats and proteins

This formula combines 14 nutrigenomic compounds that have been extensively studied by science and are highly effective, giving healthcare professionals a valuable tool which, together with a genetically appropriate diet and regular physical exercise, can help achieve the best possible results.

Leptin and ghrelin are two hormones with a recognised influence on the body's energy balance. Leptin, as a long-term mediator of this energy balance and suppressor of food intake, plays an important role in weight reduction. Ghrelin is a hormone responsible for generating the sensation of hunger, alerting us to the need to consume nutrients.

Indications:

Metabolism is a nutritional supplement for individuals who wish to support a healthy metabolism, maintain balanced blood-sugar levels and reduce cravings for sweets and fat absorption.

Directions for Use/Care:

Adults should take 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Healthy Eyes

600b

Healthy Eyes is a food supplement combining astaxanthin, lutein, zeaxanthin and blueberry, bringing together what nutrigenomics considers to be among the best and most important known nutrients for eye health.

- Prevents vision loss
- Protects the skin and eyesight from the harmful effects of solar radiation
- Protects the entire eye area from the effects of free radicals
- Prevents aging of eye tissues

This supplement contains an ideal dose of natural astaxanthin, considered one of the most powerful antioxidants. Among many other benefits, it protects the eye from the harmful effects of free radicals, improves and protects the skin by supporting its texture and reducing wrinkles and unwanted marks, and may even help resolve certain skin problems, substantially reducing the risk of skin cancer. It also promotes a generally younger appearance. It reduces the harmful effects of UV radiation on DNA and also acts as a powerful natural anti-inflammatory and cardiovascular-system protector, with particular interest for athletes.

Indications:

Healthy Eyes is a nutritional supplement for individuals seeking support to meet nutritional needs. It combines astaxanthin, lutein, zeaxanthin and blueberry - nutrients considered in nutrigenomics to be among the best and most important known nutrients for eye health - providing significant support against aging of eye tissues and the development and progression of certain eye conditions such as glaucoma, presbyopia, macular degeneration and cataracts.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Healthy Bones

1200g

Healthy Bones is a supplement with 17 nutrigenomic compounds proven effective in maintaining or promoting bone and joint health.

- Replenishes minerals (macrominerals) and other nutrients for the maintenance and renewal of bones and joints
- Provides the macrominerals essential for proper body function in their most bioavailable form

Bone maintenance (known as "remodelling") and bone density depend to a large extent on essential nutrients - such as calcium, vitamins D and K, boron, magnesium and manganese - which may be lacking in many modern diets. Healthy Bones supports musculoskeletal health, including healthy bone mineralisation and remodelling, as well as connective-tissue health and issues such as inflammation and pain, without any side effects.

Joint health may benefit from the intake of glucosamine, chondroitin and other nutrients that support cartilage integrity.

Indications:

Healthy Bones is a nutritional supplement containing a combination of 17 nutrigenomic compounds proven effective in maintaining or promoting bone and joint health. This formula may therefore support conditions affecting the osteoarticular system.

Directions for Use/Care:

Adults should take 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains fish derivatives.

No Inflammation

1200b

No Inflammation is a 100% natural anti-inflammatory formula combining 14 nutrigenomic compounds proven effective in modulating inflammation and pain, providing effective pain relief without side effects.

- Deactivates the factor (NF- κ B) responsible for chronic inflammation
- Eliminates inflammation, pain and cellular oxidation

Selective Kinase Response Modulators, or SKRMs, are nutritional substances that can bring kinase signalling back into balance, helping restore healthy signalling to genes, favourably influencing gene expression and reversing the effects of chronic conditions. With 14 nutrigenomic compounds proven effective in modulating inflammation and pain:

- Provides effective pain relief without side effects.
- Modulates production of prostaglandin E2 (PGE2) in specific target cells.
- Targets Selective Kinase Response Modulators (SKRMs) to modulate kinase activity in support of good health.
- The synergy of oleanolic acid and Rosmarinus officinalis provides high effectiveness even at a low dose, delivering an excellent cost-effectiveness ratio.

Indications:

No Inflammation is a nutrigenomic supplement designed for natural relief of pain and inflammation due to its powerful combination of therapeutic plants. It is the perfect substitute for synthetic anti-inflammatory medicines, removing all the adverse side effects that may result from taking them.

Directions for Use/Care:

Adults should take 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. May contain traces of soya or soya derivatives.

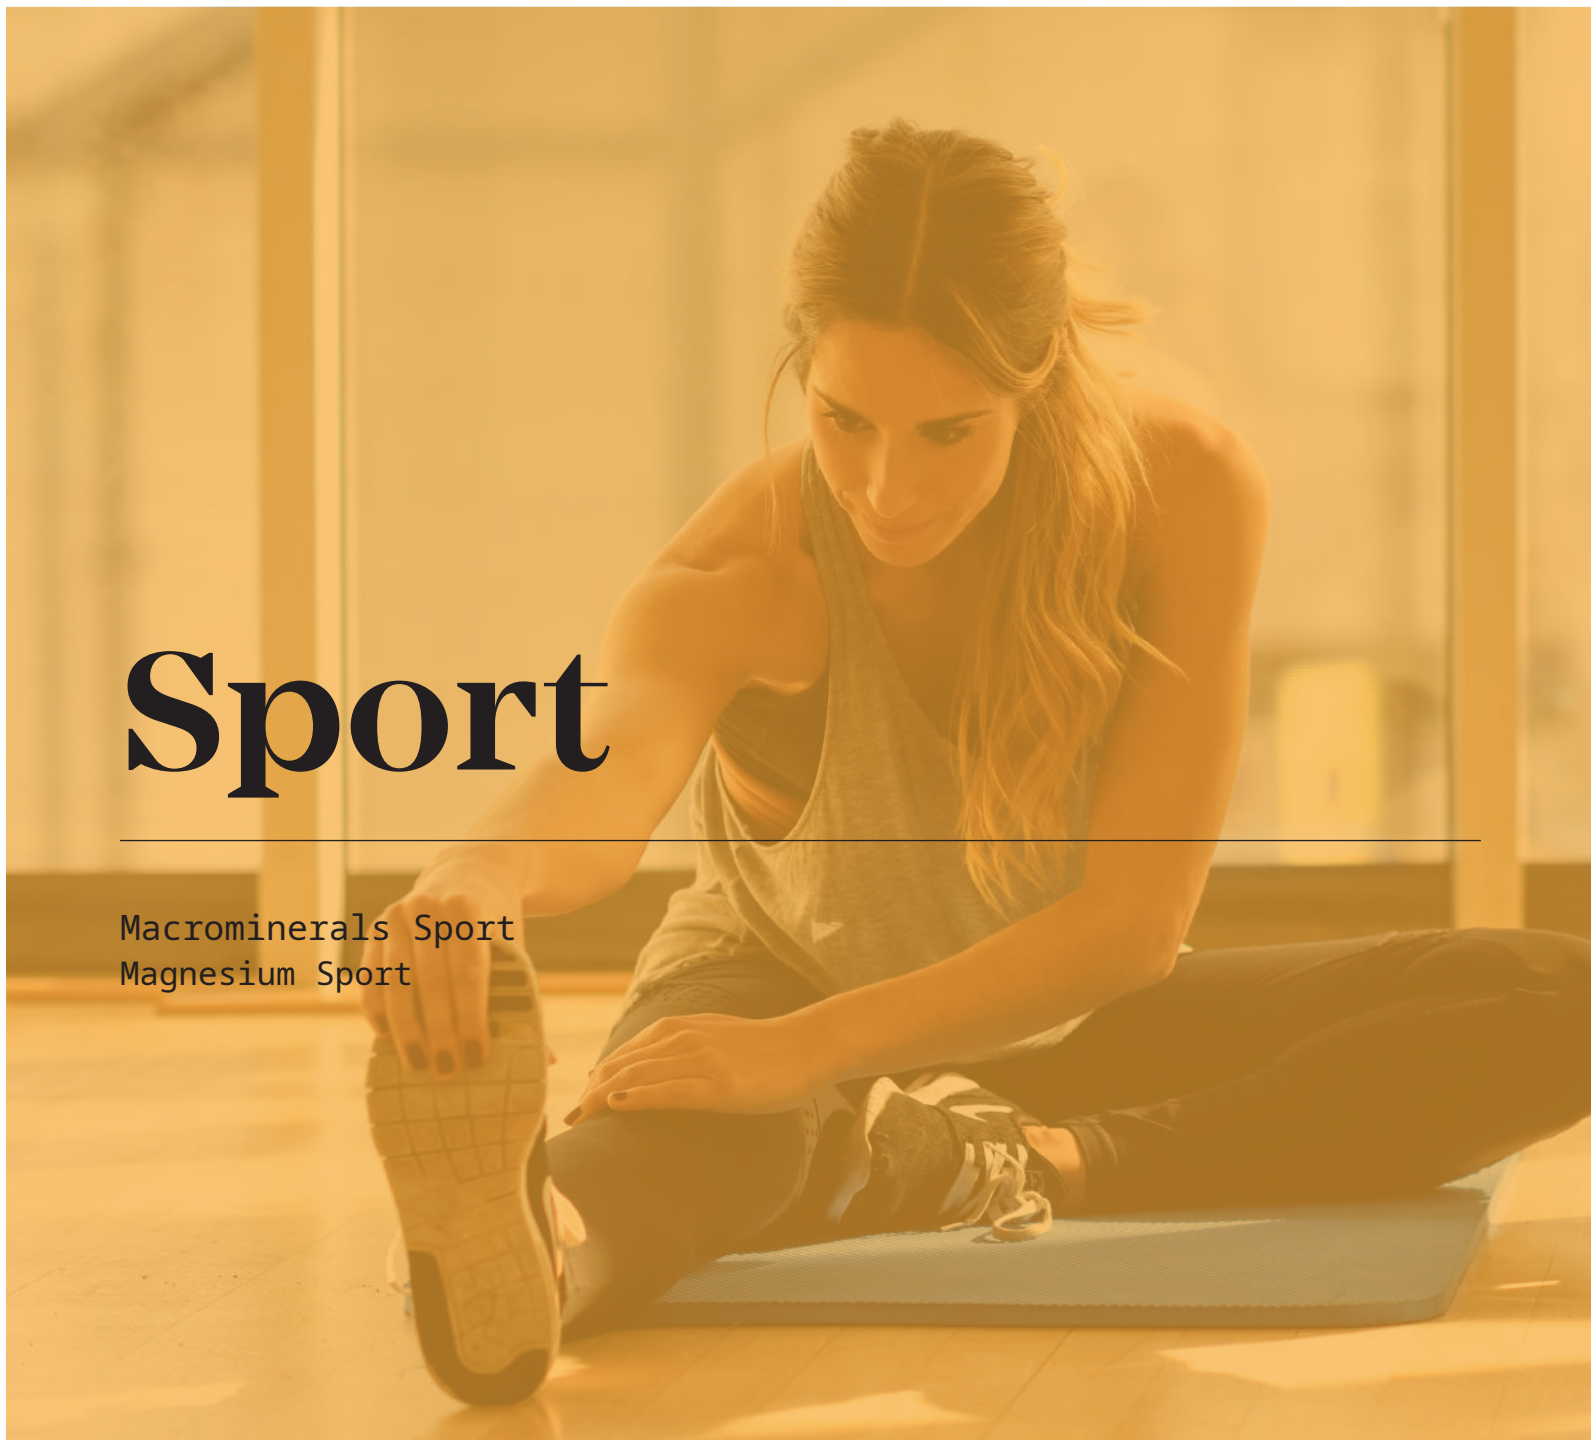

Nutritional Information per 4 capsules:

Bromelina	250MG
Boswellia serrata Resin Extract 65% (Boswellia serrata Roxb. ex Colebr.)	150MG
White Willow Bark Extract 3% Salicin (Salix alba L.)	150MG
Turmeric Root Extract 20% (Curcuma longa)	120MG
Equivalente a Curcumin pura	24MG
Soya Lecithin - 20% Phosphatidylserine, 20% Phosphatidylcholine	120MG
Equivalente a Fosfatidilcolina pura	24MG
Equivalente a Fosfatidilserina pura	24MG
Ginger Root Extract 5% (Zingiber officinale)	100MG
Papain	100MG
Olive Leaf Extract 6% (Olea europaea)	100MG
Ashwagandha Root Extract - 1.5% withanolides, 1% alkaloids (Withania somnifera)	100MG
Devil's Claw Extract 2.5% (Harpagophytum procumbens)	100MG
Provides:	
s <10PPB	
Berberis Root Extract 97%	82,5MG
Equivalente a Berberina Hidrocloridrato Puro (Barberis Vulgaris)	80MG
Rosemary Leaf Extract 6% (Rosmarinus officinalis L.)	60MG
Sophora Leaf Extract 98% (Sophora japonica)	40,8MG
Equivalente a Quercitina pura	40MG
Passionflower Flower Extract 2% (Passiflora incarnata L.)	40MG
Vegetable Capsule Shell (Hydroxypropyl Methylcellulose)

Sport

Macrominerals Sport
Magnesium Sport

Macrominerals Sport

30 

All the macrominerals essential for maintaining and protecting healthy bones and joints, supporting their strength and flexibility.

- Provides the macrominerals essential for proper body function
- Replenishes macrominerals and other nutrients for the maintenance and renewal of muscles, bones and joints

Supports increased mobility, balance and functionality of your bones, muscles and joints, while also helping post-workout recovery.

With Manganese, Glucosamine, Chondroitin, Hyaluronic Acid, among others.

The protection athletes need to maintain musculoskeletal health, mobility, balance and functionality.

Indications:

Macrominerals Sport is a food supplement formulated to meet nutritional needs, combining glucosamine, chondroitin, hyaluronic acid and other minerals. This formula therefore includes what nutrigenomics considers to be some of the best and most important macrominerals for the body's musculoskeletal health.

Directions for Use/Care:

Adults should take 1 sachet a day. Athletes are advised to take 2 sachets a day, or as prescribed by their healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains fish derivatives. Excessive consumption may have a laxative effect.

Nutritional Information per sachet:		*%NRV
Tricalcium Citrate Tetrahydrate	2300,76MG

Magnesium Sport 1200

Magnesium Sport is provided as Magnesium Malate - magnesium combined with Malic Acid.

- Supports muscle metabolism and the immune system
- Helps with chronic conditions such as Fibromyalgia
- Helps recovery from muscle pain and chronic muscle fatigue
- Helps eliminate harmful metals from the body
- Stimulates cellular energy and improves digestion

In the neuromuscular system, magnesium participates in neurochemical transmission and muscular excitability, controlling cardiac electrical activity, muscle contractility and nerve-cell function. In bone metabolism, it is necessary for maintaining bone integrity because it is metabolically related to calcium. Together with calcium and phosphate, it forms part of the mineral structure of bone and also participates in mineral exchange processes between bones and tissues. In addition, it helps regulate ossification and the proper fixation of calcium, preventing its deposition in the form of stones.

Magnesium Malate contains malic-acid molecules that bind to a magnesium molecule, providing a necessary source of both magnesium and malic acid with higher bioavailability. It also offers prolonged absorption and, because it is in malate form, does not react with gastric acid, helping avoid gastric discomfort - unlike some other forms of magnesium. Studies have observed that Magnesium Malate may reduce muscle pain, including in fibromyalgia. Malic acid is a compound that participates in the Krebs cycle and plays an important role in energy production in the body.

Indications:

Magnesium Sport is a supplement designed to help reduce pain, functional disability and behavioural and cognitive changes, being particularly relevant in conditions such as chronic fatigue syndrome and fibromyalgia. Studies have shown that it may have benefits as an adjunct in the prevention of osteoporosis and maintenance of heart health. It is relevant for high-performance athletes to support rapid recovery and relief of post-workout pain.

Directions for Use/Care:

Adults should take 3 to 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains no allergens.

Detoxifiers

Liver Hangover
Toxins

Liver Hangover

600b

LIVER HANGOVER is a nutrigenomic formula designed by EcogeneticsN[®] Laboratories to promote liver detoxification, protection and repair, while also supporting anti-inflammatory and antioxidant functions.

- Drainage and detoxification of liver cells
- Protection and regeneration of liver cells
- Promotes improved metabolism of fats and alcohol (lipotropic factors and optimisation of acetaldehyde digestion - a highly toxic and carcinogenic by-product of alcohol)

LIVER HANGOVER contains several dietary constituents shown to support liver function and integrity. Choline, inositol and betaine are involved in methyl-group metabolism, which is essential for normal liver function, and are indispensable for the metabolism of fats in the liver (lipotropic nutrients). Without lipotropics such as choline and inositol, fats and bile may become retained in the liver, contributing to various liver disorders.

B-complex vitamins, vitamin C, zinc, Taraxacum officinale and Curcuma longa support normal liver function and help protect liver cells against toxic and harmful substances. Silybum marianum contains active compounds with potential regenerative activity in liver cells. N-Acetyl-L-Cysteine supports the neutralisation of acetaldehyde.

Therefore, in addition to performing unique functions in liver protection, function and recovery, it can be used to help prevent the harmful effects of alcohol on liver cells and to help avoid a possible subsequent hangover.

Indications:

LIVER HANGOVER may be a useful nutritional supplement for individuals who wish to maintain healthy liver structure and function. It is also indicated to support recovery after alcohol consumption and help prevent a hangover.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Contains soya derivatives.

Toxins

60 6b

Powerful nutrigenomic formula combining fibres and nutrients synergistically, with a high content of detoxifying plants that support liver and intestinal detoxification and help drain toxins present in the body.

- Promotes general detoxification of the body
- Eliminates heavy metals and toxic substances
- Drains the liver and helps maintain a healthy digestive system

With today's diets, it is common for undigested food to remain in the colon, where together with other waste, microorganisms and toxins it ferments in the body and circulates through the bloodstream throughout the body.

Keeping the colon clean through regular detoxification helps prevent problems such as fatigue, allergies, constipation, loss of appetite, excess weight, bad breath and even more serious diseases.

This formula is ideal for support at the beginning of a diet, as it helps with weight loss and the relief of fluid retention.

Indications:

Toxins is a supplement designed to support detoxification at liver and intestinal level and also chelates heavy metals, helping eliminate them from the body. It is also recommended for use at the beginning of a diet, supporting body cleansing while helping eliminate excess fluid.

Directions for Use/Care:

Adults should take 2 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Store in a cool, dry place. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Keep out of reach of children. Contains no allergens.

Nutritional Information per 2 capsules:

Psyllium Seed Extract (Plantago ovata Forssk)	300MG
Oregano Leaf Extract 4:1 (Origanum vulgare L.)	45,72MG
Alfalfa Seed Extract 3:1 (Medicago sativa)	40MG
Fennel Fruit Extract 4:1 (Foeniculum vulgare)	40MG
Peppermint Leaf Extract (Mentha piperita L.)	40MG

Beauty & Youth

Beauty

Beauty

600b

This powerful combination, developed to support the most active and vibrant people, provides collagen precursors, amino acids, vitamins, minerals and essential plant extracts to help you glow from within. Enjoy all the benefits of pure, raw and natural ingredients.

- Improves the quality of skin, nails and hair

- Reduces lines, wrinkles and sagging
- Restores natural hair colour
- Stimulates collagen production
- Helps prevent cold sores

Beauty provides deep, long-lasting hydration to complement the anti-aging benefits of collagen and specific nutrients, for soft, smooth and youthful-looking skin.

- Collagen: Beauty uses collagen precursors with highly bioactive vitamin C for exceptional skin care;
- Stimulates collagen production: it is easily converted into collagen for better results;
- Reduces expression lines and wrinkles: offers the most natural way to reduce wrinkles and fine lines

Indications:

Beauty is a nutrigenomic supplement designed to help improve the health of the skin, hair and nails, supporting deep hydration, helping reduce lines and wrinkles, helping prevent premature greying of the hair and stimulating collagen production.

Directions for Use/Care:

Adults should take 2 to 4 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children. Anti-Aging

Anti-Aging Prime

Anti-Aging Prime 600b

Anti-Aging Prime is an advanced nutrigenomic formula developed to support cellular vitality, healthy longevity and the body's antioxidant protection.

With a carefully selected combination of nutrients, phytotherapeutic compounds and highly specific ingredients, Anti-Aging Prime acts in key areas associated with aging: cellular energy, oxidative stress, glycation, metabolic balance, cellular renewal and protection of internal structures.

- Supports cellular vitality and energy
- Contributes to protection against oxidative stress
- Helps combat the effects of glycation
- Supports natural cellular-renewal processes
- Promotes a comprehensive approach to healthy aging
- Formula with liposomal NAD⁺, pterostilbene, spermidine, quercetin, glutathione, pomegranate, shilajit, saffron and biotin

Aging is a natural process, but the way the body responds over time depends on several factors: metabolism, inflammation, oxidative stress, nutritional quality environmental exposure, sleep, cellular energy and regenerative capacity. Anti-Aging Prime was developed to offer complete, intelligent support, bringing together ingredients recognised for their role in maintaining cellular youthfulness and biological balance. Liposomal NAD⁺ supports cellular energy processes; pterostilbene, quercetin, pomegranate and reduced glutathione strengthen antioxidant protection; spermidine supports natural cellular-renewal mechanisms; and Glycoless®, with carbinine, helps protect against effects associated with glycation.

The formula is also enriched with shilajit, a source of fulvic acid, magnolia, taurine, saffron, black pepper with piperine and biotin, creating a premium, modern and comprehensive approach for those looking to support longevity, inner beauty and daily performance.

Indications:

Anti-Aging Prime may be a nutritional supplement suitable for adults seeking support in maintaining cellular vitality, antioxidant protection, metabolic balance, cellular renewal and healthy aging. Its formula was developed to help protect the body against key factors associated with premature aging, promoting an integrated approach to longevity, energy and well-being.

Directions for Use/Care:

Adults should take 3 capsules a day or as prescribed by a healthcare professional. The recommended daily dose should not be exceeded. If you have any health problem, consult your doctor first. Food supplements should not replace a varied and balanced diet and a healthy lifestyle. Not recommended for persons under 18 years of age, pregnant or breastfeeding women, unless prescribed/recommended by a doctor/pharmacist. Store in a cool, dry place. Keep out of reach of children.
